Professional Experience

System Engineer (*Tata Consultancy Services*) **Pune, India** 04/2023 - present

- Integrated external APIs into SQL databases to fetch and populate JSON objects, facilitating seamless data exchange between systems.
- Implemented a series of SQL-based data validation checks, ensuring the accuracy of critical datasets; this initiative has resulted in a 25% decrease in data discrepancies, augmenting overall operational efficiency.
- Executed database design and optimization strategies, architecting efficient SQL queries, stored procedures, functions, and triggers to maximize performance and scalability.

Asst. System Engineer (*Tata Consultancy Services*) **Pune, India** 04/2022 - 03/2023

- Created Denodo views for a REST web service to fetch data from the SQL database to the web application.
- Implemented a PowerShell program to fetch JSON data from a UMS interface API and insert it into SQL Server.
- Deployed code into QA and PRD environments by running IVI (Information Verification and Identification).
- Developed a responsive web interface using React components and fetched an API to populate data on the webpage.

Asst. System Engineer Trainee (*Tata Consultancy Services*) **Pune, India** 04/2021 - 03/2022

- Worked on Manufacturing Inventory Database application (MIND), fetching data from various sources like databases, APIs, Excel sheets, and XML files, and populating it on the web interface.
- Developed queries in MS SQL to create database structures like tables, constraints, and indexes.
- Enhanced and developed SQL procedures, functions, scheduled jobs, views, and triggers.
- Developed procedures to populate data in SQL Server tables from staging areas using cursors and triggers.
- Developed a SQL query to connect through an API, fetch a JSON object, and populate it into a table.

Education

Bachelor of Engineering, Electrical and Electronics (*Birla Institute of Technology*) **Ranchi, India** 2016–2020

CGPA: 6.6/10.0

Intermediate in Science (*Jesus And Mary Academy*) **Darbhangha, India** 2013–2015

Percentage: 80.4%

Matriculation (*Rose Public School*) **Darbhangha, India** 2013

CGPA: 10.0/10.0

Skills

- **Languages:** Javascript, Typescript, PowerShell
- **Data Visualization:** Microsoft Power BI, Excel
- **Database:** MySQL, MongoDB, SQL Developer
- **Database Development:** Stored Procedures, Functions, Triggers, Views, Indexing
- **Performance Tuning:** Query Optimization, Index Management, Execution Plans
- **Framework:** React, Redux, Express, Node, EJS, Next JS, Axios, Ajax, LaTeX
- **Other technologies:** Denodo, OpenShift Container Platform, HTML5, CSS, Git, Chrome Dev Tool, HP ALM

- **Soft Skills:** Problem-solving, Team Collaboration, Agile Methodologies

Online Courses & Certifications

- The complete Javascript (Jan. 2023) - [Udemy](#)
- PL/SQL by Example - Beginner to Advanced PL/SQL (Aug. 2022) - [Udemy](#)
- The Web Developer Boot camp (Aug. 2022) - [Udemy](#)
- React - The Complete Guide (including Hooks, React Router, Redux) (Aug. 2022) - [Udemy](#)
- React + Redux (Jul. 2022) - [Sololearn](#)
- SQL, (Jul. 2022) - [Sololearn](#)

Projects

- Expense Tracker - An expense tracker app used to store all your expenses. Technologies used: React, HTML, CSS, JavaScript. - [Project Link](#)
- Mapty - A simple JavaScript app that helps you update your workout status using a map! Technologies used: JavaScript. - [Project Link](#)
- FoodCart - Demo app to order food remotely. Technologies used: HTML, CSS, JavaScript, React, Redux. - [Project Link](#)
- TextUtils - Word count and text manipulation tool. Technologies used: HTML, CSS, JavaScript. - [Project Link](#)

Languages

- **English** [Proficient in Reading, Writting, Speaking]
- **Maithili** [Native]
- **Hindi** [Proficient in Reading, Writting, Speaking]
